

INDUTECH®

BENDING SERVICES

Pipe and Structural Shapes

Indutech Canada LP offers the most complete range of pipe bending services available in Canada from a single source located in Calgary, Alberta.

Induction Bending

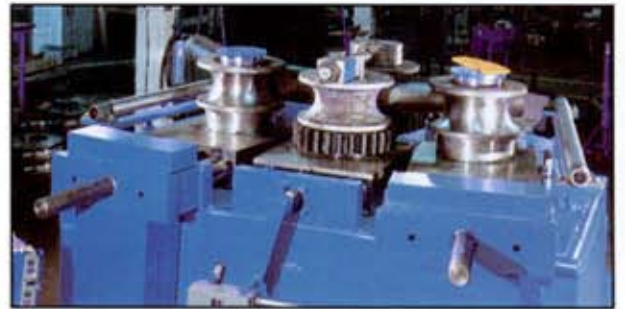

Induction pipe bending offers the advantages of tighter radius, reduced wall thinning and ovality plus retained or improved mechanical properties of the pipe material.

- capacity to 36" (914 mm) O.D.
- wall thickness to 4" (102 mm)
- radii of 3D and larger
- angles to 180°
- complete material range from carbon to alloy and stainless steels.

Roll Bending

- capacity to NPS 6" (168.3 mm)
- radii of 36" and larger
- angles to 360°
- pipe coils

Rotary Draw Bender

- capacity to NPS 6" (168.3 mm)
- radii of 3D and 5D
- angles to 180°

Manufacturing standards at Indutech are in conformance with ISO 9002. Tolerances as per industry standards or your project specification. Flexibility of pipe supply.
